# New Album Page :

# Album Screen

Go to user  
home page.

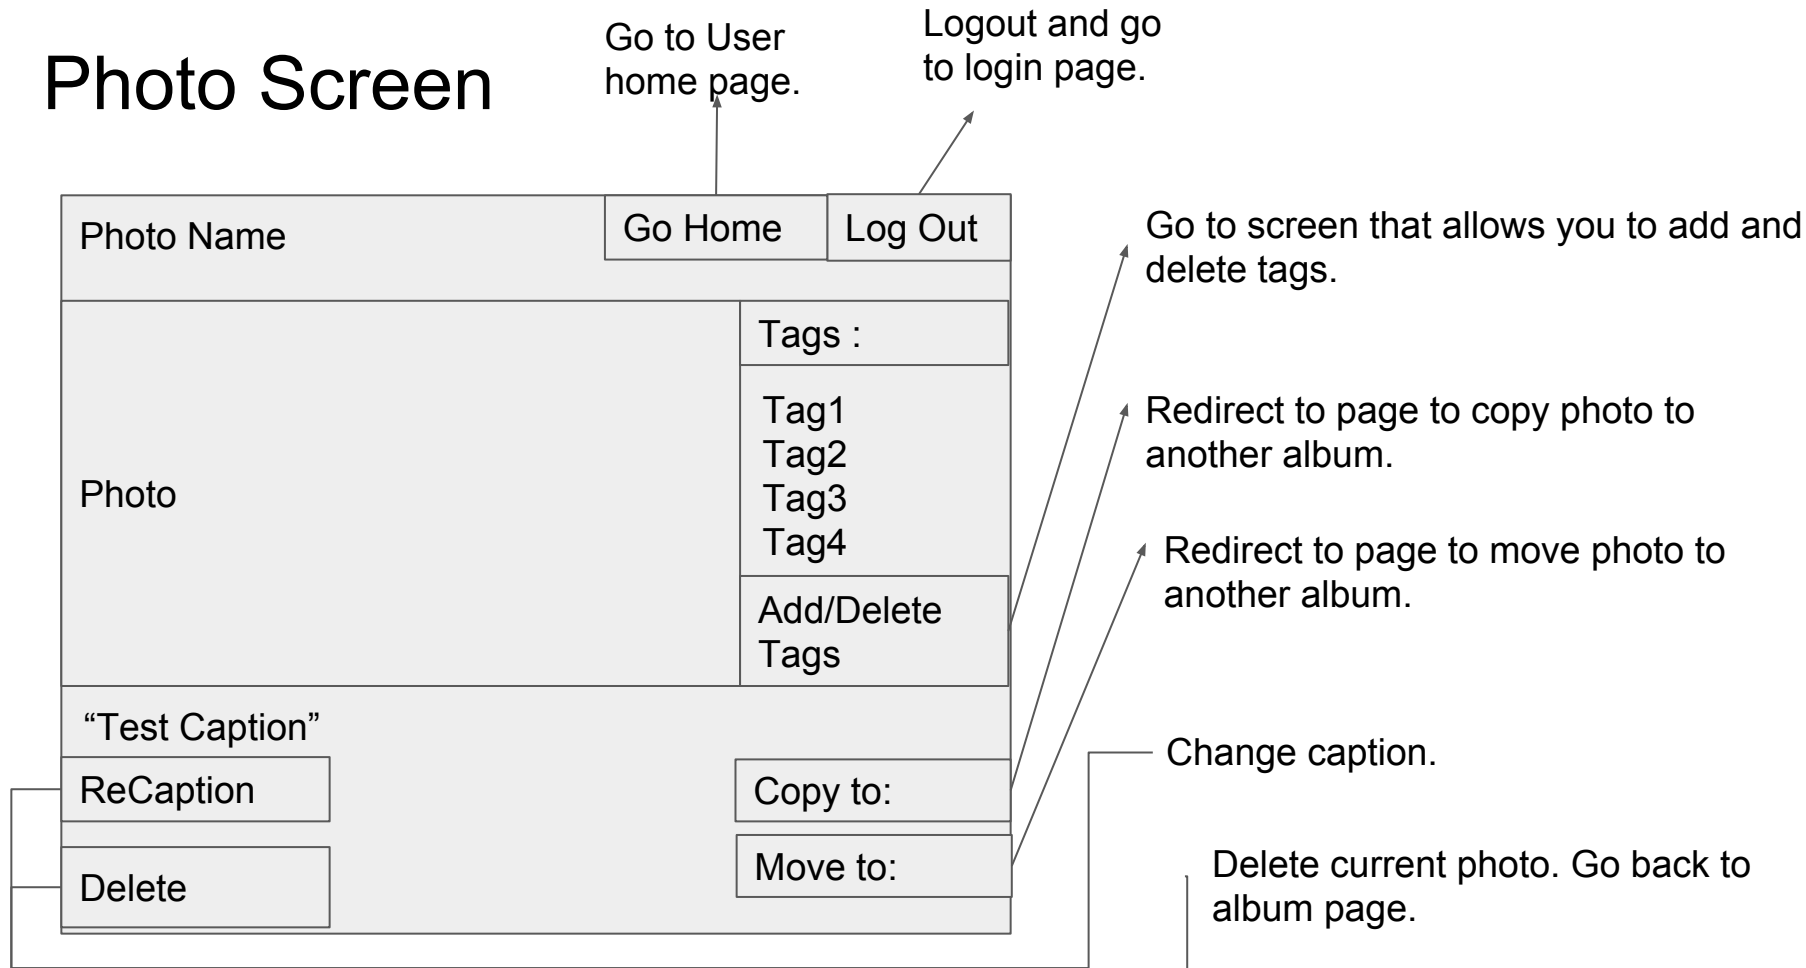

Go to Login screen.

When you click the individual photo, redirect to photo screen that shows the photos info and allows CRUD operations.

Add new photo to album

# Photo Screen

# Add and Delete Tags

The interface is a light gray rectangular box. On the left is a placeholder box labeled "Photo". To its right is a table titled "Photo Name:". The table has five rows, each with a tag name and a delete button (an 'X' in a square). Below the table is a form with a label "Add New Tag:", an input field, and an "ADD" button. At the bottom are two buttons: "Go Back" on the left and "Save" on the right.

Photo Name:	
Tag1	X
Tag2	X
Tag3	X
Tag4	X
Tag5	X

Add New Tag:  ADD

Go Back Save

This table shows all tags related to the photo on the left. It allows you to delete tags from this screen.

Allows you to add new tags to picture.

Save changes.

Go back and will not auto save.

# Copy and Move to Another Album :

\* Copy and Move will be separate screens but they will look exactly the same. Only difference being copy keeps the photo in current album. Move will not keep photo in current album.
